

Decision Node 1: Hair Length Preference

Question: "Do you prefer short or long hair?"

- **Branch 1 (Short):** Go to Decision Node 2.
- **Branch 2 (Long):** Go to Decision Node 3.

Why: The first major factor in any hairstyle choice is hair length — short vs. long styles require different maintenance levels and aesthetics.

Decision Node 2: Maintenance Level

Question: "Do you prefer a low-maintenance style or something with more styling involved?"

- **Branch 1 (Low Maintenance):** → **Crew Cut (Leaf Node)**
- **Branch 2 (Styled):** → **Fade Haircut (Leaf Node)**

Why:

- Crew cuts are easy to manage and quick to style.
 - Fades require more frequent touch-ups and styling, but offer a modern look.
-

Decision Node 3: Texture Preference

Question: "Is your hair naturally curly or straight?"

- **Branch 1 (Curly):** → **Curly Top (Leaf Node)**
- **Branch 2 (Straight):** → **Long Textured Style (Leaf Node)**

Why:

- Curly top suits natural curls and volume.
- Long textured styles flatter straight hair and emphasize layering.
